

VEERESH HANNI

Full-Stack Developer · Open-Source Author

Gadag, India | veereshhanni347@gmail.com | +91 8151858969

portfolio: veereshhanni.me | linkedin.com/in/veeresh-hanni-9775ba33b | github.com/veeresh-hanni | dbduck.org.in

PROFESSIONAL SUMMARY

Full-stack developer and open-source author with hands-on experience across Python, Django, React, MySQL, and MongoDB. Creator of DBDuck, a production-deployed open-source Python library that unifies data access across six databases (PostgreSQL, MySQL, SQLite, MSSQL, MongoDB, Neo4j) via a single API, with a live documentation site at dbduck.org.in. Internship experience shipping full-stack features for a real-time fintech application. CGPA 9.5 in Computer Science with a strong foundation in data structures & algorithms, REST APIs, and Docker-based deployments. Seeking a Software Developer / Full-Stack Developer role to build scalable backend systems and production-grade web applications.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Java, SQL, HTML5, CSS3

Frameworks & Libraries: Django, Django REST Framework, React.js

Databases: MySQL, PostgreSQL, MongoDB, SQLite, MSSQL

APIs & Testing: REST APIs, Postman, Django ORM, MongoDB Atlas

DevOps & Tools: Git, GitHub, Docker, GitHub Actions, CI/CD, VS Code

Security: AES-256 encryption, Python cryptography library, authentication workflows

CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks, Agile/Scrum

OPEN SOURCE

Creator & Maintainer | DBDuck — Universal Data Object Model (UDOM)

Jan 2026 – Present

dbduck.org.in · github.com/veeresh-hanni/DBDuck

- Architected and published DBDuck, an open-source Python library providing a single unified API across 6 databases (PostgreSQL, MySQL, SQLite, MSSQL, MongoDB, Neo4j), eliminating up to 70% of database-specific boilerplate code.
- Designed the Universal Data Object Model (UDOM) abstraction layer, enabling seamless database-switching without modifying core business logic and improving portability across production and development environments.
- Built and deployed a full documentation site (dbduck.org.in) with React (71 components) and Vercel, including SEO optimization, structured data schemas, and Google Search Console integration.
- Identified and resolved 28 SQL injection vulnerabilities through a full security audit with Bandit, confirmed closed in v0.3.0.
- Implemented Django-style ORM models with full relationship support, CLI tooling, and a GitHub Actions CI/CD pipeline for automated testing and release.

INTERNSHIP EXPERIENCE

React Web Developer Intern | Zetpeak

Apr 2026 – Jun 2026

- Built an interactive, gamified product roadmap page in React with animated milestone nodes to visualize feature timelines for stakeholders.
- Converted a static HTML page into a Next.js page and added task-management functionality backed by localStorage.
- Improved UI consistency and navigation by integrating lucide-react icons across the application.

Software Development Engineer Intern | Bluestock Fintech

Apr 2025 – May 2025

- Built 4+ full-stack features for a real-time IPO web application using React.js and **Django**, reducing average API response time by ~20% through targeted query optimization.
- Implemented SQL CRUD operations for IPO datasets and refactored 3 high-traffic REST API endpoints, cutting latency from ~450ms to ~310ms while improving throughput.
- Collaborated in an Agile team, contributing to code reviews and API design discussions that improved system scalability.

TECHNICAL PROJECTS

Pingone — AI Chat Application | React, Django, MongoDB Atlas, PostgreSQL (Supabase)

2025 – Present

pingone.onrender.com

- Developed a production-deployed full-stack AI chat application using the OpenAI GPT API, handling real-time conversations through a responsive React frontend and Django backend.

- Designed a hybrid database architecture: MongoDB Atlas for AES-256 encrypted chat messages, and Supabase (PostgreSQL) for structured user, role, and metadata management.
- Implemented end-to-end encrypted chat storage with Python's cryptography library, securing 100% of message data at rest.
- Designed scalable REST APIs with Django REST Framework, optimizing request handling for reliable performance under concurrent user load.

Pharmacy Dispensing System | Python/Django, MySQL, HTML, CSS, JavaScript

Dec 2024 – Apr 2025

- Delivered a full pharmacy dispensing system managing 500+ drug records with complete CRUD operations, Django ORM models, authentication workflows, and MVC architecture within a 5-month timeline.
- Designed and implemented frontend interfaces with HTML/CSS/JavaScript, improving usability for pharmacy staff workflows.
- Replaced raw SQL with Django ORM queries, reducing code complexity and improving maintainability for future contributors.

EDUCATION

Diploma in Computer Science and Engineering | Government Polytechnic, Gadag

Aug 2022 – Apr 2025

CGPA: 9.5 / 10

Secondary School Leaving Certificate (SSLC) | SJBVP Hosahalli, Gadag

2021 – 2022

Percentage: 96.48%

CERTIFICATIONS & COURSES

- Scaler Academy — Java & Object-Oriented Programming
- Algorithms365 — SDE / Full-Stack Development (Python, DSA, OOP, SQL/MySQL, Django, React)
- Infosys Springboard — HTML, CSS, JavaScript
- HackerRank Skill Certificates — Python (Gold Badge), SQL (Gold Badge), RestAPI(Intermediate)

ACHIEVEMENTS & ACTIVITIES

- Led a team of 4 in academic projects, consistently delivering features on schedule.
- Participated in Odoo Hackathon 2025&26 and the Google Baseline Tooling Hackathon.
- Active open-source contributor — published and maintained DBDuck (v0.4.4+) with a full security audit, documentation site, and monetization setup via GitHub Sponsors.
